PROJECTS

Personal Portfolio Website, *HTML, CSS, and JavaScript*
Developed a personal portfolio to showcase web development projects, which enhanced professional visibility and personal branding, and solved the challenge of lacking a central platform to present skills and growth.

Task Manager Application, *Python, Tkinter, and MongoDB*
Built a task manager using Python, Tkinter(for GUI) and MongoDB to manage and store tasks, which improved efficiency and organization, and solved the problem of tracking tasks manually without a structured system.

Advertisement management platform, *Python, Nicegui*
Developed the frontend of a responsive advertisement management platform with features to post adverts, browse listings in a grid view, and manage adverts through view, edit, and delete options. Collaborated with backend APIs to fetch and display data seamlessly.
